TO WHOM IT MAY CONCERN

This is to acknowledge that Doctor Paolo MAZZONE has worked, as a Visiting Neurosurgeon, from October 4th to November 3th, 1995, in the Department of Neurosurgery of the GRENOBLE UNIVERSITY HOSPITAL.

He followed most of the activities of the Department of Neurosurgery and especially in functional Neurosurgery. He directly participated to :

- |   |            |
|---|------------|
| - Basal ganglia chronic stimulation for Parkinson's | 5 patients |
| - Cortectomies for Epilepsy                         | 3 patients |
| - Stereotactic Biopsies                             | 8 patients |
| - Trigeminal microdecompression                     | 1 patient  |
| - Sweet thermorhizotomy                             | 1 patient  |
| - Spinal Cord chronic stimulation                   | 1 patient  |
| - Synchroned Baclofen pump                          | 1 patient  |

Dr Mazzone was a very dedicated and interesting fellow and I will be always glad to receive him in my Department.

Pr A.L. BENABID  
Director Inserm U.318  
Head of Neurosurgery  
Professor of Biophysics
